Although our supplier base is diversified, still we are dependent significantly on our suppliers. As per nature of our business, we do not have any contracts with our suppliers with any commitment to supply products to us. If our suppliers are unable to supply our products in sufficient quantities and on a consistent basis, we may not be able to sell our products to our customers in a timely manner. If we were to experience a supply disruption, it could take an extended period of time to find and qualify an alternate vendor. There is no guarantee that we would be able to obtain such alternative sources of supply on a timely basis, if at all. 5. *A certain amount of our revenue is generated from certain key customers, and the loss of one or more such customers, the deterioration of their financial condition or prospects, or a reduction in their demand for our products could adversely affect our business, results of operations, financial condition and cash flows.*

We are dependent on a limited number of customers for a certain portion of our revenues. Our top ten customers accounted for approximately 48.60 % of our revenue from operations for the year ending March 31, 2023. There can be no assurance that our significant customers in the past will continue to place similar orders with us in the future. Also as per nature of our business, we do not have any firm agreements with our customers. A significant decrease in business from any such key customer, whether due to circumstances specific to such customer or adverse market conditions affecting the industry or the economic environment generally, such as the COVID-19 pandemic, may materially and adversely affect our business, results of operations and financial condition.

Our reliance on a select group of customers may also constrain our ability to negotiate our arrangements, which may have an impact on our profit margins and financial performance. We cannot assure you that we will be able to maintain historic levels of business from our significant customers, or that we will be able to significantly reduce customer concentration in the future. In addition, our revenues may be adversely affected if there is an adverse change in any of our customers supply chain strategies or a reduction in their outsourcing of products we offer, or if our customers decide to choose our competitors over us or if there is a significant reduction in the volume of our business with such customers. The loss of one or more of our significant customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows.

Further, to sustain or increase our revenue, we must add new customers and encourage existing customers to allocate a greater portion of their marketing spend to us.

6. *Our Company is partly dependent on third party transportation providers for the supply of materials and delivery of our products and any disruption in their operations or a decrease in the quality of their services could affect our Company's reputation and results of operations.*

Our Company avails services of our promoter group entities as well as third party transportation providers for the supply of our materials and delivery of our products to our domestic customers. Though our business has not experienced any disruptions due to transportation strikes in the past, any future transportation disruption may have an adverse effect on the supplies from our suppliers and deliveries to our customers. These transportation facilities may not be adequate to support our existing and future operations. In addition, the materials, and products maybe lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. We procure our raw materials (Bitumen) from Dubai via imports and from other domestic suppliers / importers. There may also be delay in delivery of raw materials and products which may also affect our business and results of operation negatively. An increase in the freight costs or unavailability of freight for transportation of our products to our customers may have an adverse effect on our business and results of operations. Further, disruptions of transportation services due to weather-related problems, high seas risk, strikes, lockouts, inadequacies in the road infrastructure and port facilities, or other events could impair our ability to supply our products to our customers. Any such disruptions could materially and adversely affect our business, financial condition, and results of operations.

7. *Growing demand of sustainable alternatives of Bitumen may adversely affect our business, results of operation, financial condition and cash flows*

Although Bitumen is by product obtained from distillation of oil and is not directly harmful to environment but owing to its origin to non renewable fossil fuels, there is growing demand for searching sustainable alternatives. While researchers and engineers are exploring various options such as using recycled materials, bio-based binders, and innovative technologies to reduce the environmental impact of bitumen usage but none such products are viable as replacement of bitumen in commercial and application sense. In case of development of any commercial alternative of bitumen in future, or any new technology being implemented to replace bitumen, our business, results of operations, financial condition and cash flows may be adversely affected.

8. Our Company does not have long-term agreements with any of our customers for purchasing its products and is subject to uncertainties in demand. There is no assurance that these customers will continue to purchase our products from us or that they will not scale down their orders. This could impact financial performance of our Company.

Our Company has been dealing with some of our customers for past years, we do not have any long-term agreements with any of our customers. As a result, our customers can terminate their relationships with us due to a change in preference or any other reason on immediate basis, which could materially and adversely impact our business. Consequently, our revenue may be subject to variability because of fluctuations in demand for our products. Our Company's customers have no obligation to place order with us and may either cancel, reduce or delay orders. The orders placed by our Company's customers are dependent on factors such as the customer satisfaction with the level of service that our Company provides, fluctuation in demand for our Company's products, customer's inventory management, amongst others.

Although, we have a strong emphasis on quality, timely delivery of our products and personal interaction by the top management with the customers, any change in the buying pattern of buyers can adversely affect the business of our Company.

9. We have offered Equity Shares during the last one year at a price below the Issue Price.

Our Company had allotted shares in Bonus issue on September 8, 2023 in the ratio of 25:1 and Rights Basis at issue price of Rs. 10/- on September 27, 2023 in the in the last 12 months which are at lower than the Issue Price. The Equity Shares allotted to shareholders pursuant to this Issue may be priced significantly higher due to various reasons including better performance by the Company, better economic conditions and passage of time. Since then the initial years have been devoted to build the foundation of our Business. Although our Promoters-Directors Mr. Haresh Mohanlal Shengani and Mr. Rahul Mohanlal Shengani have been in the same line of business since 2016 but our company has limited operating history and this relatively limited history of our Company make it difficult to accurately assess our future prospects.

15. Our business requires us to obtain and renew certain registrations, licenses and permits from government and regulatory authorities and the failure to obtain and renew them in a timely manner may adversely affect our business operations.

Our business operations require us to obtain and renew from time to time, certain approvals, licenses, registrations and permits, some of which may expire and for which we may have to make an application for obtaining the approval or its renewal. Our company has applied for Registration of Factory License to the Directories of Factories, Government of Gujarat on December 23, 2023. Our company is yet to apply for PCB License and Shops & Establishment License at Bhopal, Madhya Pradesh and Factory License to Directories of Factories, Government of Madhya Pradesh. Also, our company is yet to apply for Factory License to Directories of Factories, and for conversion of land from Agricultural to Commercial on which our factory is situated at Pali, Rajasthan. If we fail to get these approvals/licenses or if we fail to maintain such registrations and licenses or comply with applicable conditions, or a regulatory authority claims we have not complied, with these conditions, our certificate of registration for carrying on a particular activity may be suspended and/or cancelled and we will not then be able to carry on such activity. This could materially and adversely affect our business, financial condition, and results of operations. We cannot assure you that we will be able to obtain approvals in respect of such applications or any application made by us in the future. For more information about the licenses required in our business and the licenses and approvals applied for, please refer “Government and Other Approvals” on page 239 of this Draft Prospectus, respectively.

16. There are some discrepancies/errors noticed in our Company’s records relating to the forms required to be filed with the Registrar of Companies. Any penalty or action taken by any regulatory authorities in future for non-compliance with provisions of corporate and other law could impact the financial position of the Company to that extent.

There are some discrepancies/errors noticed in our Company’s records relating to the forms required to be filed with the Registrar of Companies, including but not limited to the following:

As per the provisions of the Companies Act, 2013, all the charges created by the Company, in past and present, are required to be recorded in the register of charges and the forms required to be filed for creation, modification or release of charge with the ROC generally within the timeline. In one of the situations, our company has failed to file modification of charge for increase in cash credit limit from Rupees Three Crores Fifty Lakhs to Rupees Nine Crores Fifty Lakhs from ICICI Bank Limited. However, the same charge is already satisfied on 04th October, 2023. Till date, there has been no penalty levied on the Company for such default. However, it cannot be assured that even in future no

such penalty will be levied. Any penalty or action taken by any regulatory authorities in future for non-compliance with provisions of corporate and other law could impact the financial position of the Company to that extent.

17. None of the Directors of our Company have been directors on the board of any listed company in the past and therefore they do not have an experience of functioning as a director on the board of a listed company.

Our Company will have to comply with applicable provisions of Companies Act, SEBI Listing Regulations and other applicable laws upon listing of Equity Shares on the stock exchanges. Post listing, our Directors will have to ensure that our Company is in compliance with Companies Act, SEBI Listing Regulations and other applicable laws. While we have appointed a set of Directors, none of the Directors of our Company have been directors on the board of any listed company in the past and therefore they do not have an experience of functioning as a director on the board of a listed company. We cannot assure you that the Directors of our Company will be able to efficiently carry out the duties and responsibilities cast upon them under the Companies Act, SEBI Listing Regulations and other applicable laws. In the event of any material non-compliance where our Directors are held liable and responsible, we may have to appoint new directors or replace our present Directors, which could be time-taking and involve additional costs for our Company. Further, the transition in the Directors could impact the day to day management of our Company, which could in turn impact our business operations and financial condition.

18. Our failure to accurately forecast and manage inventory could result in an unexpected shortfall and/or surplus products, which could harm our business.

We monitor our inventory levels based on our own projections of future demand. An inaccurate forecast of demand for our product can result in the unavailability / surplus of products. This unavailability of products in high demand may depress sales volumes and adversely affect customer relationships. Conversely, an inaccurate forecast can also result in an over-supply of products, which may increase costs, negatively impact cash flow, reduce the quality of inventory, erode margins substantially and ultimately create write-offs of inventory. Any of the aforesaid circumstances could have a material adverse effect on our business, results of operations and financial condition.

19. Any change in government policies or quality norms by our customers, which we may not be able to adhere to, may affect our business growth, operations and financials.

Substantial part of our revenue is received from our customers that are involved in road construction business and hence there is sectoral concentration of our customers. This puts our business to risk of exposure to one sector i.e. road construction sector. Any change in the business cycle of this sector or any downturn owing to any policy change for the sector may put our business operations at risk. We cannot assure that we will be able to mitigate any such risk that may arise due to our sectoral concentration. For further information, please see “Key Regulations and Policies in India” on page 93 of this Draft Prospectus.

20. Quality concerns and negative publicity, if any, would adversely affect the value of our brand, and our sales.

Our business is dependent on the trust our customers have in the quality of our products as well as on our ability to protect our brand value. Any negative publicity regarding our Company, brands or products, including those arising from a drop in quality of our products from our vendors, or any other unforeseen events could adversely affect our reputation, our brand value, our operations and our results from operations.

21. Any past or future non-compliance in ROC filings may expose us to fines and/or penalties from the statutory and regulatory authorities.

We are required to file various forms and maintain records as per the provisions of Companies Act, 2013. In past there were certain inadvertent discrepancies in our annual return related to wrong spelling and details of our Promoters. While the errors were purely accidental, we cannot assure that there will not be any penal action from regulatory bodies. We cannot assure you that any such proceedings, if initiated, will not have a material adverse effect on our financial condition or reputation. Further in the balance sheets filed by the company with Registrar of Companies certain related party disclosures were left to be covered. But the same have been covered and rectified in the restated financial statements of the company. Further, there are certain forms which are filed with delayed fees with RoC. Although, no show cause notice in respect of the above has been received by the Company till date, any penalty imposed for such non-compliance in future by any regulatory authority could affect our financial conditions to that extent.

We cannot assure you that such delays will not occur in the future and such delay in the filing forms and / or

any non-compliance may attract levies of fines/penalties by the RoC.

22. We operate in an unorganized industry and face significant competition. Our inability to compete effectively, market our products relative to our competitors may lead to lower market share and adversely affect our operations and profitability.

Our Industry consists of large established players and small players. The larger players are integrated in operations from procurement of raw materials to supply of final products. Whereas, the smaller players do not have the integrated operations. This puts the larger players at an advantage owing to their size and economies of scale. We have a number of competitors offering products similar to us. Further, there are no entry barriers in this industry and any expansion in capacity of the existing manufacturers would further intensify competition. The major key players operating in the Indian bitumen market are Agarwal Industries Corporation Ltd, Indian Oil Corporation Ltd., Hindustan Petroleum Corporation Limited, Bharat Petroleum Corporation Ltd., Oil & Natural Gas Corporation Ltd., Total India, Tiki Tar Industries India Ltd, Juno Bitumix Pvt Ltd., Universal Bituminous Industries Pvt. Ltd. and few other players. To stay ahead in the competition, we strive to differentiate based on our operational efficiencies, efficient procurement, supply of quality products and healthy relationships with suppliers and customers. In the event of price competition from our competitors, we may be required to reduce the price of our products while maintaining quality standards and our Company may not always be able to do so. Some of our competitors may have greater financial resources, generate higher revenues, and therefore, be able to better respond to market changes and shifts in consumer spending patterns and changes in consumer sentiments and tastes. They also may be in a better position than us to sustain losses in revenue due to pricing pressures. Accordingly, we cannot be certain that we will be able to compete effectively with these competitors or that we will not lose customers to these competitors. If we are not able to compete effectively, our business, results of operations and financial condition could be adversely affected.

23. We have in the past entered into related party transactions and may continue to do so in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our Company's financial condition and results of operations.

Our Company has entered into various transactions with our directors, relatives of directors, promoters, promoter group entities. These transactions, inter-alia includes sales, remuneration, loans and advances etc. For details, please refer to "Annexure -27 - Related Party Transactions" under Section titled "Financial Information of the Company" and Chapter titled "Capital Structure" beginning on page 129 and 47 respectively of this Draft Prospectus. Our Company has entered into such transactions due to easy proximity and quick execution in accordance with Companies Act 2013 and other applicable laws. Additionally, while it is our belief that all our related party transactions have been conducted on an arm's-length basis, we cannot provide assurance that we could have achieved more favourable terms had such transactions been entered with third parties. Although all related-party transactions that we may enter into in the future are subject to approval by our Audit Committee, Board or shareholders, as required under the Companies Act, we cannot assure you that such future transactions or any other future transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operations or that we could not have achieved more favourable terms if such transactions are not entered into with related parties. Furthermore, it is likely that we may enter into related party transactions in the future. Any future transactions with our related parties could potentially involve conflicts of interest. Accordingly, there can be no assurance that such transactions, individually or in the aggregate, will not have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

24. Our operations are subject to high working capital requirements. If we are unable to generate sufficient cash flows to allow us to make required payments, there may be an adverse effect on our results of operations.

Our business requires significant amount of working capital and major portion of our working capital is utilized towards raw material procurement, debtors and inventories. Presently we meet our working capital needs from internal accruals and banking arrangements. We have been sanctioned financing facilities from ICICI Bank Limited. In future, our inability to maintain sufficient cash flow, credit facility and other sources of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. Further, we have high outstanding amount due from our debtors which may result in a high risk in case of non-payment by these debtors. In case of any such defaults from our debtors, it may affect our business operations and financials.

25. Industry information included in this Draft Prospectus has been derived from industry sources. There can be no assurance that such third-party statistical, financial and other industry information is complete, reliable or accurate.

This Draft Prospectus includes information on Industry in which we operate from various sources. For further details, please see “Industry Overview” beginning on page 72. The data used in these sources may have been reclassified by us for the purposes of presentation and may also not be comparable. Industry sources and publications generally state that the information contained therein has been obtained from sources generally believed to be reliable, but that their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured. Industry sources and publications are also prepared based on information as of specific dates and may no longer be current or reflect current trends. Accordingly, investors must rely on their independent examination of, and should not place undue reliance on, or base their investment decision solely on this information. The recipient should not construe any of the contents in this report as advice relating to business, financial, legal, taxation or investment matters and are advised to consult their own business, financial, legal, taxation, and other advisors concerning the transaction.

26. Our success depends largely upon the services of our Promoter, Managing Directors and other key managerial personnel and our ability to attract and retain them.

We are dependent on our Promoter, Managing Director, WTD and Key Managerial Personnel for setting our strategic direction and managing our businesses. Our Promoter, Managing Director, WTD have over past years-build relations with suppliers, customers and other persons who are connected with us. Accordingly, our Company’s performance is dependent upon the services of our Promoter, our Managing Director, WTD, and other key managerial personnel. Our future performance will depend upon the continued services of these persons. Demand for key managerial personnel in the industry is intense and our inability to attract and retain key managerial personnel may affect the operations of our Company.

27. The Objects of the Issue for which funds are being raised, are based on our management estimates and have not been appraised by any bank or financial institution or any independent agency.

The deployment of funds will be entirely at our discretion, based on the parameters as mentioned in the chapter titled “Objects of the Issue”. The fund requirement and deployment, as mentioned in the section titled “Objects of the Issue” on page 58 of this Draft Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter “Objects of the Issue” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “Objects of the Issue” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

28. Our inability to manage growth could disrupt our business and reduce our profitability.

A principal component of our strategy is to continue to grow by expanding the size and geographical scope of our businesses, as well as the development of our new products portfolio. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial, and internal controls. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values, and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition, and adversely affect our results of operations.

29. Our bitumen business is subject to seasonal and other fluctuations that may affect our cash flows and business operations.

Our business and operations are affected by seasonal factors and in particular, the monsoon season in the second quarter of each Fiscal Year where the road construction activities slows down, there by our customers downsize the procurement from us. This may restrict our ability to carry on activities related to our supply and trading of bitumen and fully utilize our resources. During periods of curtailed activity due to adverse weather conditions, we may continue to incur operating expenses, but our project related activities may be delayed or reduced. Such fluctuations may adversely affect our cash

flows and business operations related to the toll roads operated and managed by us.

30. The prices we are able to obtain for the bitumen products depend largely on prevailing market prices.

Bitumen have been subject to price fluctuations resulting from weather, domestic and foreign trade policies, shifts in supply and demand and other factors beyond our control. As a result, any fluctuation in prices could have a material adverse effect on our Company and our results of operations.

31. Members of our Promoter Group will continue to retain significant control in our Company after the Issue, which will allow them to influence the outcome of matters submitted to shareholders for approval. Such a concentration of ownership may also have the effect of delaying, preventing, or deterring a change in control.

After the completion of this Issue, our Promoter and Promoter Group will continue to hold significant ownership of our Company. As a result, our Promoter will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting, and our other shareholders will be unable to affect the outcome of such voting. Our Promoter may take or block actions with respect to our business, which may conflict with our interests or the interests of our minority shareholders, such as actions which delay, defer or cause a change of our control or a change in our capital structure, merger, consolidation, takeover or other business combination involving us, or which discourage or encourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of us. We cannot assure you that our Promoter and members of our Promoter Group will act in our interest while exercising their rights in such entities, which may in turn materially and adversely affect our business and results of operations. We cannot assure you that our Promoter will act to resolve any conflicts of interest in our favor.

32. Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.

Our operations may be subject to incidents of theft or damage to inventory. The business may also encounter some inventory loss on account of employee theft, vendor fraud and general administrative error. While we have not experienced any such instance in the past, there can be no assurance that we will not experience any fraud, theft, employee negligence, security lapse or similar incidents in the future, which could adversely affect our results of operations and financial condition. Though we have insurance losses due to theft, fire, breakage or damage caused by other casualties, could adversely affect our results of operations and financial condition.

33. Certain data mentioned in this Draft Prospectus has not been independently verified.

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

34. The requirements of being a public listed company may strain our resources and impose additional requirements.

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange(s) which require us to file unaudited financial results on a half yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

35. The price of the Equity Shares may be highly volatile after the Issue.

The price of the Equity Shares on the Indian stock exchanges may fluctuate after this Issue as a result of several factors, including, volatility in the Indian and global securities market; our operations and performance; performance of our competitors and the perception in the market about investments in the our industry; adverse media reports on us or the industry; changes in the estimates of our performance or recommendations by financial analysts; significant developments in India's economic liberalization and deregulation policies; and significant developments in India's fiscal and environmental regulations. There can be no assurance that the prices at which the Equity Shares are initially traded will correspond to the prices at which the Equity Shares will trade in the market subsequently.

36. There is no existing market for our Equity Shares, and we do not know if one will develop to provide you with adequate liquidity. Further, an active trading market for the Equity Shares may not develop and the price of the Equity Shares may be volatile.

An active public trading market for the Equity Shares may not develop or, if it develops, may not be maintained after the Issue. Our Company, in consultation with the lead manager, has determined the Issue Price. The Issue Price may be higher than the trading price of our Equity Shares following this Issue. As a result, investors may not be able to sell their Equity Shares at or above the Issue Price or at the time that they would like to sell. The trading price of the Equity Shares after the Issue may be subject to significant fluctuations in response to factors such as, variations in our results of operations, market conditions specific to the sectors in which we operate, economic conditions of India and volatility of the securities markets elsewhere in the world.

37. The Equity Shares have never been publicly traded and the Issue may not result in an active or liquid market for the Equity Shares.

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. Although we currently intend that the Equity Shares will remain listed on the Stock Exchanges, there is no guarantee of the continued listing of

EXTERNAL RISK FACTORS

38. The continuing effect of the COVID-19 pandemic on our business, results of operations and financial condition is highly uncertain and cannot be predicted.

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could adversely affect the overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The outbreak of COVID 19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines and lockdowns. These measures have impacted and may further impact our workforce and operations, the operations of our consumers. In case there is a rapid increase in severe cases of infections leading to deaths, where the measures taken by governments are not successful or are any bans imposed by the government in this regard are lifted prematurely, may cause significant economic disruption in India and in the rest of the world.

If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general. The outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of COVID- 19 will cause an economic slowdown and it is possible that it could cause a global recession.

39. A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. There have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in

inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investor's reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

40. Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details please refer to the chapter "Government and Other Statutory Approvals" on page 239 for details of the laws currently applicable to us. The governmental and regulatory bodies in India and other jurisdictions where we operate may notify new regulations and/or policies, which may require us to obtain approvals and licenses from the government and other regulatory bodies, or impose onerous requirements and conditions on our operations, in addition to those which we are undertaking currently. Any such changes and the related uncertainties with respect to the implementation of new regulations may have a material adverse effect on our business, financial condition, results of operations and cash flows.

41. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

42. Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares

43. Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in affect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained

44. Our performance is linked to the stability of policies and the political situation in India.

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse effect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the industrial equipment manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

45. Acts of terrorism, civil disturbance, communal conflicts, regional conflicts and other similar threats to security could adversely affect our Company's business, cash flows, results of operations and financial condition.

Increased political instability and regional conflicts, evidenced by the threat or occurrence of terrorist attacks, enhanced national security measures, conflicts in several countries and regions in which our Company operates, strained relations arising from these conflicts and the related decline in customer confidence may hinder our ability to do business. Any escalation in these events or similar future events may disrupt our Company's operations or those of our customers and suppliers. Further, certain events that are beyond the control of our Company, such as violence or war, including those involving India, the United Kingdom, the United States or other countries, may adversely affect worldwide financial markets and could potentially lead to a severe economic recession, which could adversely affect our business, results of operations, financial condition and cash flows, and more generally, any of these events could lower confidence in India's economy. Southern Asia has, from time to time, experienced instances of civil unrest and political tensions and hostilities among neighboring countries. Political tensions could create a perception that there is a risk of disruption of services provided by India-based companies, which could have an adverse effect on our business, future financial performance and price of the Equity Shares. Furthermore, if India were to become engaged in armed hostilities, particularly hostilities that are protracted or involve the threat or use of nuclear weapons, the Indian economy and consequently Company operations might be significantly affected. India has from time to time experienced social and civil unrest and hostilities, including riots, regional conflicts and other acts of violence. Events of this nature in the future could have an adverse effect on our ability to develop our business. As a result, our business, results of operations and financial condition may be adversely affected. These events have had and may continue to have an adverse impact on the global economy and customer confidence, which could in turn adversely affect our Company's revenue, operating results and cash flows. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares. The impact of

These events on the volatility of global financial markets could increase the volatility of the market price of securities and may limit the capital resources available to our Company and to our customers and suppliers.

46. Rights of shareholders under Indian laws may differ from the laws of other jurisdictions.

Our articles of association and Indian law govern our corporate affairs. Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions.

SECTION VI – ABOUT THE COMPANY

INDUSTRY OVERVIEW

The information in this chapter has been extracted from various websites and publicly available documents from various industry sources. The data may have been re-classified by us for the purpose of presentation. None of the Company and any other person connected with the Issue have independently verified this information. Industry sources and publications generally state that the information contained therein has been obtained from believed to be reliable, but their accuracy, completeness and underlying assumptions are not guaranteed, and their reliability cannot be assured. Industry sources and publications are also prepared based on information as of specific dates and may no longer be current or reflect current trends. Industry sources and publications may also base their information on estimates, projection forecasts and assumptions that may prove to be incorrect. Accordingly, investors should not place undue reliance on information.

GLOBAL ECONOMIC OVERVIEW

The baseline forecast is for global growth to slow from 3.5 percent in 2022 to 3.0 percent in 2023 and 2.9 percent in 2024, well below the historical (2000–19) average of 3.8 percent. Advanced economies are expected to slow from 2.6 percent in 2022 to 1.5 percent in 2023 and 1.4 percent in 2024 as policy tightening starts to bite. Emerging market and developing economies are projected to have a modest decline in growth from 4.1 percent in 2022 to 4.0 percent in both 2023 and 2024. Global inflation is forecast to decline steadily, from 8.7 percent in 2022 to 6.9 percent in 2023 and 5.8 percent in 2024, due to tighter monetary policy aided by lower international commodity prices. Core inflation is generally projected to decline more gradually, and inflation is not expected to return to target until 2025 in most cases.

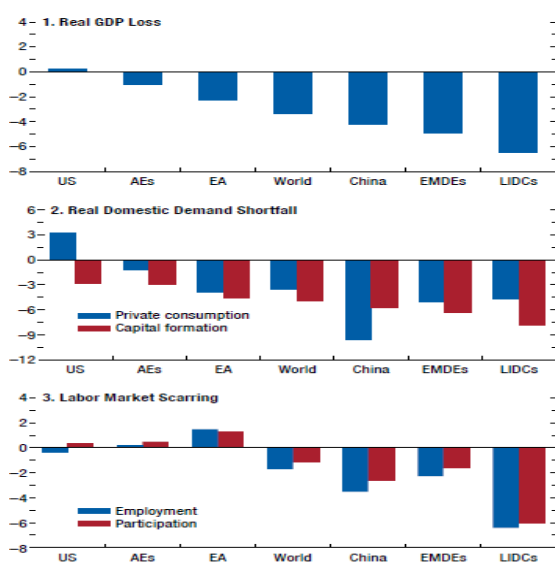

Monetary policy actions and frameworks are key at the current juncture to keep inflation expectations anchored. It emphasizes the complementary role of monetary policy frameworks, including communication strategies, in helping achieve disinflation at a lower cost to output through managing agents' inflation expectations. Given increasing concerns about geoeconomic fragmentation.

Resilient global economy is limping along, with growing divergences

The global economy continues to recover slowly from the blows of the pandemic, Russia's invasion of Ukraine, and the cost-of-living crisis. In retrospect, the resilience has been remarkable. Despite the disruption in energy and food markets caused by the war, and the unprecedented tightening of global monetary conditions to combat decades-high inflation, the global economy has slowed, but not stalled. Yet growth remains slow and uneven, with growing global divergences. The global economy is limping along, not sprinting.

According to the projections, global growth will slow from 3.5 percent in 2022 to 3 percent this year and 2.9 percent next year, a 0.1 percentage point downgrade for 2024 from our July projections. This remains well below the historical average. Headline inflation continues to decelerate, from 9.2 percent in 2022, on a year-over-year basis, to 5.9 percent this year and

4.8 percent in 2024. Core inflation, excluding food and energy prices, is also projected to decline, albeit more gradually than headline inflation, to 4.5 percent in 2024.

As a result, projections are increasingly consistent with a "soft landing" scenario, bringing inflation down without a major downturn in activity, especially in the United States, where the forecast increase in unemployment is very modest, from 3.6 to 3.9 percent by 2025.

Growing Global Divergences

After a strong initial rebound from the depths of the COVID-19 pandemic, the pace of recovery has moderated. Several forces are holding back the recovery. Some reflect the long-term consequences of the pandemic, Russia's war in Ukraine, and increasing geoeconomic fragmentation. Others are more cyclical, including the effects of monetary policy tightening necessary to reduce inflation, withdrawal of fiscal support amid high debt, and extreme weather events. Despite signs of economic resilience earlier this year and progress in reducing headline inflation, economic activity is still generally falling short of pre-pandemic (January 2020) projections, especially in emerging market and developing economies (Figure 1.1, panel 1).

The strongest recovery among major economies has been in the United States, where GDP in 2023 is estimated to exceed its prepandemic path. The euro area has recovered, though less strongly—with output still 2.2 percent below prepandemic projections, reflecting greater exposure to the war in Ukraine and the associated adverse terms-of-trade shock, as well as a spike in imported energy prices. In China, the pandemic-related slowdown in 2022 and the property sector crisis contribute to the larger output losses of about 4.2 percent, compared with prepandemic predictions. Other emerging market and developing economies have seen even weaker recoveries, especially low-income countries, where output losses average more than 6.5 percent. Higher interest rates and depreciated currencies have exacerbated the difficulties of low-income countries, placing more than half either at high risk of distress or already in distress. Overall, global output for 2023 is estimated at 3.4 percent (or about \$ 3.6 trillion in 2023 prices) below prepandemic projections. Private consumption has also recovered faster in advanced economies than in emerging market and developing economies, owing to an earlier reopening in the former group facilitated by greater availability of effective vaccines, stronger safety nets, more ample policy stimulus, and greater feasibility of remote work. These factors supported livelihoods during the pandemic, and household consumption is now broadly back to prepandemic trends. Among advanced economies, private consumption has been stronger in the United States than in the euro area, with households receiving larger fiscal transfers early in the pandemic and spending the associated savings more quickly; being better insulated from the rise in energy prices resulting from the war in Ukraine; and feeling relatively confident amid historically tight US labor markets, which have supported real disposable incomes (Figure 1.1, panel 2). Among emerging market and developing economies, the consumption shortfall is particularly large in China, reflecting tight restrictions on mobility during the COVID-19 crisis.

Investment, on the other hand, has uniformly fallen short of prepandemic trends across regions. Businesses have shown

less enthusiasm for expansion and risk taking amid rising interest rates, withdrawal of fiscal support, dimmer prospects for product demand, stricter lending conditions, and growing uncertainties 75 million to 95 million more people were living in extreme poverty in 2022 compared with prepandemic estimates. Spikes in food prices and related insecurities following Russia’s invasion of Ukraine, as well as bouts of extreme weather, have accentuated these difficulties. The global average temperature in July 2023 was the highest on record for any month, amid reports of catastrophic flooding, heat waves, and wildfires in many regions. Overall, the global prevalence of undernourishment is significantly higher than before the pandemic (FAO and others 2023).

Resilient start to 2023, signs of slowdown

Despite these persistent challenges, several headwinds to global growth subsided earlier this year. The World Health Organization announced in May that it no longer considered COVID-19 a global health emergency, and infections and hospitalizations appear to remain relatively limited, despite a recent uptick in some regions. Supply chains, which the pandemic disrupted, have largely normalized, with shipping costs and suppliers’ delivery times back to prepandemic levels. And global financial conditions eased after Swiss and US authorities took strong action in March to contain turbulence in their banking sectors.

Amid these conditions, global GDP expanded by 3.4 percent in the second quarter of 2023 compared with a year earlier outperforming forecasts, including those in the April 2023 WEO. The resilience reflected strong consumption amid tight labor markets in the United States and robust activity in economies with large travel and tourism sectors, such as Italy, Mexico, and Spain. These developments offset a slowdown in more interest-rate-sensitive manufacturing sectors.

Figure 1.3. Cumulative Excess Savings in Advanced Economies
(Percent of GDP)

China: Slower Growth

China’s growth momentum is fading following a COVID-19 reopening surge in early 2023. Growth slowed from 8.9 percent in the first quarter of 2023 (seasonally adjusted annualized quarterly rate) to 4.0 percent in the second quarter. With ample economic slack and declining energy and food prices, inflation fell to an estimated 0.2 percent (year over year) in the second quarter of 2023. Country Garden China’s largest property developer and a major beneficiary of government support—is facing severe liquidity stress, a sign that real estate distress is spreading to stronger developers, despite policy easing measures. Meanwhile, real estate investment and housing prices continue to decline, putting pressure on local governments’ revenues from land sales and threatening already fragile public finances. Commodity exporters and countries that are part of the Asian industrial supply chain are the most exposed to China’s loss of momentum.

Figure 1.6. China's Economy Losing Momentum

Tighter Monetary Policy, Tighter Credit

Acute stress in the banking sector has receded. The March 2023 banking scare remained contained and limited to problematic regional banks in the United States and Credit Suisse a Swiss globally systemically important bank on account of swift reaction by authorities in both countries. However, rapid rate hikes in major advanced economies over the past 18 months, a necessary response to rapidly rising inflationary pressures, have resulted in a tight monetary policy stance real rates above neutral rates that is expected to endure well into 2025.

INDIAN ECONOMY OVERVIEW

Introduction

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Real GDP at constant prices in the second quarter of 2022–23 is estimated at US\$ 1.94 trillion (Rs. 160.06 trillion), showing a growth of 7.2% as compared to the First Revised Estimates of GDP for the year 2021-22 of US\$ 1.81 trillion (Rs. 149.26 trillion), indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. In FY22, India's service exports stood at US\$ 254.4 billion. Furthermore, India's overall exports (services and merchandise) was estimated at US\$ 770.18 billion in FY23. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-December 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable as a result of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Market Size

India's nominal gross domestic product (GDP) at current prices is estimated to be at US\$ 3.31 trillion (Rs. 272.41 trillion) in FY22. Additionally, the Nominal GDP at current prices in Q3 of 2022-23 was US\$ 874.84 billion (Rs. 71.82 trillion), as against US\$ 792.3 billion (Rs. 65.05 trillion) in 2021-22, estimating a growth of 10.4%. With 115 unicorns valued at more than US\$ 350 billion, as of February 2023, India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at US\$ 1.3 billion, 0.2% of GDP in the fourth quarter of FY23.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- As of January 6, 2023, India's foreign exchange reserves stood at US\$ 561,583 million.
- 1,261 deals were recorded of more than US\$ 46 billion of Private Equity (PE) – Venture Capitalist (VC) investments in 2022. 111 mega transactions (rounds of US\$ 100 million or more) totalling US\$ 31 billion were completed in 2022.
- Merchandise exports in March 2023 stood at US\$ 38.38 billion, with total merchandise export of US\$ 447.46 billion during the period of April-March 2023. The overall exports (merchandise and service exports) in 2022-23 was estimated at US\$ 770.18, exhibiting a positive growth of 13.84%.

- India ranks 3rd position in the global number of scientific publications further improving India's Global Innovation Index (GII) rank from 81st in 2014 to 40th in 2022.

- Between April 2000 – March 2023, cumulative FDI equity inflows to India stood at US\$ 9919.63 billion.

Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. - The Government of India is expected to increase public health spending to 2.5% of the GDP by 2025.

Road Ahead

In the second quarter of FY23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In June 2023 (Provisional), CPI-C inflation was 4.81%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

BITUMEN INDUSTRY

Bitumen is a black to dark brown sticky material, composed principally of high molecular weight hydrocarbons. It is a semi-solid hydrocarbon product of crude oil distillation, which is produced by removing the lighter fractions (such as liquid petroleum gas, petrol, and diesel) from heavy crude oil during the refining process. The physical properties of bitumen include adhesion, resistance to water, hardness and higher softening point.

Bitumen refers to a substance produced through the distillation of crude oil. Bitumen is known for its waterproofing and adhesive properties and is commonly finds its application in the construction industry. Bitumen is most essential property while constructing road and bridges. It is primarily used for road construction, roofing, waterproofing, in railways, industrial flooring, adhesives and soundproofing.

Characteristics of Bitumen include viscosity, water resistance, durability, adhesiveness. Bitumen has ductility and viscoelastic properties, owing to which when bitumen is deformed by traffic load, it can return to its original shape without damage or cracks. Bitumen is a durable material that can withstand a variety of environmental conditions.

Features:

- Durability
- Adhesiveness
- Water Resistant

Market Outlook

Most of the bitumen consumed is processed into asphalt for road construction. Asphalt is a mixture of rock aggregates and bitumen. Bitumen serves as a binding agent and is responsible for the stability of asphalt. Depending on the type of bitumen or composition of the mixture used, asphalt roads can be made suitable for regions with different climatic conditions or various levels of operational demands. Asphalt is also used for airport runways, parking decks, and working areas in ports.

Bitumen Market, By Product, 2027 (USD Billion)

(Source: <https://www.gminsights.com/industry-analysis/bitumen-market>)

Based on product, the bitumen will hold the largest market share of close to 60% in terms of value in 2027. Around 85% of all the bitumen manufactured is used as binder in asphalt concrete for roads, car parks, airport runways, and footways due to the sturdiness and ability to be repaired quickly.

With rising number of automobile vehicles in the world, mostly in the developing economies of Latin America and Asia Pacific, the demand for road construction will witness a significant rise in the upcoming years. Global vehicle sales reached 77.62 million units in 2020 and is expected to reach 125.43 million units by end of the forecast period, thus generating a need for broader and superior quality roads. Easy availability and low cost of paving grade bitumen will enhance the bitumen market value in road construction activities around the world. Owing to its versatile applications, the demand for paving based bitumen is expected to grow with a 4.2% CAGR over the forecast period.

The global bitumen market is projected to grow from USD 51.69 billion in 2021 to USD 67.14 billion in 2028 at a CAGR of 3.8% during the 2021-2028 period. The global impact of COVID-19 has been unprecedented and staggering, with witnessing a negative impact on demand across all regions amid the pandemic. The global market exhibited a lower growth of 2.91% in 2020 as compared to the average year-on-year growth during 2017-2019. The rise in CAGR is attributable to this market's demand and growth, returning to pre-pandemic is over. The global market is projected to grow significantly, owing to the rapid growth in demand from the construction sector.

(Source: <https://www.gminsights.com/industry-analysis/bitumen-market>)

Based on application, the global bitumen market is categorized into roadways, waterproofing, adhesives, insulation and others. The roadways application segment accounted for the highest share in 2020 and generated revenue of over USD 41.69 billion in the same year. Road construction has the most extensive use of bitumen where it is used as a binder to process asphalt concrete. This segment includes the application of bitumen in the repair works and new construction of roads and pavements including airport runways, motorways, flyovers and platforms.

Increasing automotive traffic throughout the world driven by the increasing Purchasing Power Parity (PPP) in the emerging economies will result in the demand for a more extensive road and highway network with multiple lanes to accommodate all cars during peak hours. Moreover, rapid urbanization and moderation will also increase the connectivity of rural and urban areas, thus boosting the demand for road development activities.

Paving-grade bitumen has garnered more than two-thirds of the market share in 2022 and is projected to grow at a CAGR of 3.3% during the forecasted period. Rapid urbanization and population growth, particularly in emerging economies, have led to a significant increase in infrastructure development. Governments are investing in the construction and expansion of roads, highways, airports, and other transportation networks to meet the growing demand for efficient transportation. Paving grade bitumen is a crucial component in road construction, and the surge in infrastructure projects has resulted in increased demand for bitumen.

The road construction segment has garnered more than three-fourths of the market share and is projected to grow at a CAGR

of 3.7% during the forecasted period. Many emerging economies, particularly in Asia and Africa, have seen a surge in road construction projects in the past couple of decades. Nations like China and India have massively invested in improving their infrastructure to support their burgeoning populations and growing economies. International institutions like the World Bank and Asian Development Bank provide significant funding for road construction projects, especially in developing nations. Their investments often aim to facilitate trade, connectivity, and socio-economic development.

Asia-Pacific has garnered more than two-fifths of the market share and is projected to grow at a CAGR of 3.7% during the forecast period. China continues its rapid urbanization and industrialization processes, there's an ever-increasing need for roads, highways, and modern infrastructure. Bitumen is a primary component of road construction. China's relentless urbanization and infrastructural development have amplified its demand for bitumen. As the world's most populous country and the second-largest economy, China's focus on constructing highways, airports, and urban roads underscores its priority to bolster both intra and inter-city connectivity. Bitumen, with its primary use as a binder in road asphalt, is fundamental to this vision. This increasing demand is also influenced by China's Belt and Road Initiative (BRI), a monumental infrastructural project spanning numerous countries. This initiative, aiming to enhance trade routes and connectivity, involves extensive road and infrastructure development, naturally pushing the bitumen demand even higher.

Major players operating in the Bitumen market are Hindustan Petroleum Corporation Limited, Royal Dutch Shell, Asphalt & Bitumen West Co., TotalEnergies, GOIL PLC, Exxon Mobil Corporation., RAHA Bitumen, Inc.

Bitumen Market, By Region

(Source: <https://www.gminsights.com/industry-analysis/bitumen-market>)

Asia-Pacific will exceed USD 35 Billion in 2027 driven by the growing application of bitumen products in various applications. The road and highway construction industry in APAC countries, such as China, India, and Australia, has been increasing rapidly and is driven by the growing automobile ownership and increasing urbanization in the region. The rise in freight and passenger road transportation in the country, followed by manufacturing activities will further propel road construction and development. Additionally, growing investment industrial sectors have significantly influenced the bitumen revenue in the country.

Growth Drivers

The demand for road building will significantly increase in the next years due to the increasing number of automobiles in the world, particularly in the expanding economies of Latin America and the Asia Pacific. Only 2.5% of all new automobiles delivered in 2019 were electric vehicles, or 2.2 million units.

Although the global auto market shrank in 2020, sales of electric vehicles defied the trend, increasing to 3 million units and accounting for 4.1 percent of all vehicle sales. Sales of electric vehicles increased by twice to 6.6 million in 2021, accounting for nearly 9% of the global auto market. Electric vehicles accounted for the whole net increase in worldwide auto sales in 2021.

To improve wayside accommodations on national highways, the administration announced its intention in October 2021 to install charging stations once each 40 to 60 kilometers. According to this, 700 e-vehicle charging points are expected to be implemented by 2023, covering 35,000 to 40,000 km of major highways.

Hence, the rising sale of electric cars, along with the rising development of charging stations for vehicles, has led to an increase in the demand for the market to rapid growth in the construction of roads.

Indian Bitumen Market

The India bitumen market was valued at \$2.8 billion in 2018, and is projected to reach \$3.6 billion by 2026, growing at a CAGR of 2.8% from 2019 to 2026.

The Indian bitumen market size is segmented on the basis of type, end-use industry, and region. Depending on type, the market is classified into paving grade bitumen, oxidized bitumen, polymer modified bitumen, and bitumen emulsions. By end-use industry, it is classified into road construction, waterproofing, and others. Region wise, it is analyzed across North India, East India, Northeast India, South India, and West India.

The growth of Indian bitumen market is majorly driven by increase in road and building construction activities. Construction of various national highways, expressways, and airport runways boosts the demand for bitumen across the country. Bitumen is processed into asphalt for road construction. In addition, rise in investments by the government for the development of national highways and expressways, which include projects relating two-laning of highways, the National Highways Development Project, six-laning of crowded stretches of the Golden Quadrilateral, special program for the development of road connectivity in affected areas, development of Vijayawada-Ranchi road, and for providing last mile connectivity, is anticipated to drive the growth of the market. Furthermore, bitumen is widely used in the construction industry for roofs, owing to its physical properties such as adhesion, resistance to water, hardness, ductility, and higher softening point. Therefore, growth in the construction industry due to growth in population across the cities and demand for new houses led to increase in demand for bitumen across the country.

The major key players operating in the Indian bitumen market include Agarwal Industries Corporation Ltd, Indian Oil Corporation Ltd., Hindustan Petroleum Corporation Limited, Bharat Petroleum Corporation Ltd., Oil & Natural Gas Corporation Ltd., Total India, Tiki Tar Industries India Ltd, Juno Bitumix Pvt Ltd., Universal Bituminous Industries Pvt. Ltd., and Swastik Tar Industries. Other players operating in this market include Hincol, Jalnidhi Bitumen Specialities Pvt. Ltd., OOMS Polymer Modified Bitumen Pvt Ltd., Sapco, and UFTI.

Bitumen Market Regional Insights

North India accounted for the major India bitumen market share in 2018, owing to major road network development initiatives undertaken by the Government of India (GoI) in the North India Region, which include national highways projects in Uttar Pradesh and Punjab. In addition, maintenance and repair of rural roads constructed under Pradhan Mantri Gram Sadak Yojana (PMGSY) in Haryana, Rajasthan, Uttarakhand, and Himachal Pradesh is anticipated to increase the demand for bitumen across these states; thereby, driving the growth of the bitumen market across North India

Bitumen, is a sticky, black, and highly viscous liquid or semi-solid form of petroleum, has various applications across following industries:

1. **Road Construction:** Bitumen is widely used in road construction as asphalt. It binds the aggregate together, forming asphalt concrete. This durable and flexible material is used for surfacing roads, highways, airport runways, and parking lots.
2. **Waterproofing:** Bitumen's waterproofing properties make it ideal for sealing and protecting surfaces against moisture. It's used in roofing materials, damp-proofing basements, and lining water tanks.
3. **Adhesives:** Bitumen is an essential component in manufacturing adhesives and sealants. It's used in products like roofing adhesives, carpet tiles, and flooring adhesives.
4. **Insulation:** In some instances, bitumen is used as insulation material, especially in the roofing industry. It helps insulate buildings and maintain consistent temperatures indoors.
5. **Paving:** Beyond roads, bitumen is also used for paving pathways, biking trails, and playgrounds due to its durability and weather-resistant properties.
6. **Paints and Coatings:** Bitumen-based paints and coatings provide protection against corrosion for metals and concrete

surfaces. They're used in industries like marine, automotive, and construction.

7. **Polymer Modification:** Bitumen can be modified with polymers to enhance its properties, such as improving durability, elasticity, and temperature resistance. These modified bitumen find applications in high-stress areas of roads, bridges, and airports.
 8. **Soundproofing:** Bitumen-based materials are used in soundproofing applications, especially in building materials designed to reduce sound transmission.
 9. **Industrial Applications:** Bitumen is used in various industrial processes, such as in the production of electrical cables, sound-deadening materials for automotive parts, and anti-corrosion pipe coatings.
 10. **In agriculture:** Bitumen can be used in farming for various purposes, including sealing ponds or reservoirs to prevent water seepage and in protecting wooden fence posts from rotting.
- These diverse applications make bitumen a valuable material across different sectors due to its waterproofing, adhesive, and durable properties. Presently we supply bitumen to our customers who are engaged in road construction sector. So while bitumen has wide scale application, our exposure is presently limited to road construction industry.

Presently, we offer following grades of bitumen to our customers:

Unit Overview

OUR MANUFACTURING PROCESS

- Depending on the nature of procurement- Imported bitumen is received at Mundra port and brought to our manufacturing unit, in case the bitumen is procured from domestic supplies/ other importers, the same is supplied to our manufacturing unit by the supplier or is collected by us from the consignment of the importer or its location.
- After reaching our unit, the bitumen is loaded into the decanter plant, where with the help of thermic fluid heater, bitumen undergoes transitions from solid to liquid state at 150-160 degree Celsius. The thermic fluid heater plays a vital role in providing the necessary heating to transform the bitumen into its liquid state within the decanter plant.
- The resulting liquid bitumen from this process is used as a base for further grading.
- To manufacture other grades of bitumen and bitumen emulsion, we utilize the Bitumen base and then implement a blowing process. This process is integral for customizing the bitumen to achieve different grades and for manufacturing of bitumen emulsion.
- We possess an in-house testing facility equipped with a viscosity meter utilized to determine the grade of bitumen.
- The finished product is stored in storage tanks located within our facility. The processed bitumen is then loaded into tankers and subsequently dispatched to our customers.

Presently, we manufacture following grades of bitumen:

Bitumen VG 10	Bitumen 60/70	Bitumen Emulsion RS1
Bitumen VG 30	Bitumen 80/100	Bitumen Emulsion RS2
Bitumen VG 40	-	Bitumen Emulsion SS1
-	-	Bitumen Emulsion SS2

PROCUREMENT OF RAW MATERIALS

The first step in the manufacturing process, is the procurement of raw materials. Our principal raw materials used by us is bitumen which is procured through both import and local purchase from domestic suppliers/importers. Under the import route, we book the import consignment from the supplier. All our imports are from Dubai. In case of procurement from domestic suppliers/ importers, we place purchase order with the domestic supplier/ importer who in turn imports/ had imported the consignment. The purchase price of our raw materials generally follows market prices. We do not have any long-term supply contracts with any of our raw material suppliers. However, our relationship with our suppliers and repeat business from them allowed us to develop a long-standing relationship with various raw materials suppliers.

Highways-related laws

National Highways Act, 1956

The Central Government is responsible for the development and maintenance of ‘National Highways’ and may delegate any function relating to development of ‘National Highways’ to the relevant state government in whose jurisdiction the ‘National Highway’ falls, or to any officer or authority subordinate to the central or the concerned state government.

The Central Government may also enter into an agreement with any person (being, either an individual, a partnership firm, a company, a joint venture, a consortium or any other form of legal entity, Indian or foreign, capable of financing from own resources or funds raised from financial institutions, banks or open market) in relation to the development and maintenance of the whole or any part of a ‘National Highway’. Such agreement may provide for designing and building a project and operating and maintaining it, collecting fees from users during an agreed period, which period together with construction period is usually referred to as the ‘concession period’. Upon expiry of the ‘concession period’, the right of the person to collect fees and his obligation to operate and maintain the project ceases and the facility stands transferred to the central government.

Under the National Highways Act, 1956 (the “**NH Act**”), the Central Government is vested with the power to declare a highway as a national highway and also to acquire land for this purpose. The Central Government may, by notification, declare its intention to acquire any land when it is satisfied that for a public purpose such land is required to be acquired for the building, maintenance, management or operation of a national highway or part thereof. The NH Act prescribes the procedure for such land acquisition which *inter alia* includes entering and inspecting such land, hearing of objections, declaration of acquisition and the mode of taking possession. The NH Act also provides for payment of compensation to owners and any other person whose right of enjoyment in that land has been affected.

National Highways Fee (Determination of Rates and Collection) Rules, 2008

The National Highways Fee (Determination of Rates and Collection) Rules, 2008 (the “**NH Fee Rules**”) regulate the

collection of fee for the use of a national highway. Pursuant to the NH Fee Rules, Central Government may, by a notification, levy fee for use of any section of a national highway, permanent bridge, bypass or tunnel forming part of a national highway, as the case may be. However, the Central Government may, by notification, exempt any section of a national highway, permanent bridge, bypass or tunnel constructed through a public funded project from levy of fees. The NH Fee Rules do not apply to the concession agreements executed or bids invited prior to the publication of such rules i.e. December 5, 2008.

The collection of fees in case of a public funded project shall commence within 45 days from the date of completion of the project. In case of a private investment project, the collection of such fee shall be made in accordance with the terms of the agreement entered into by the concessionaire. The NH Fee Rules further provide for the base rate of fees applicable for the use of a section of the national highway, permanent bridge, bypass or tunnel, as the case may be, for different categories of vehicles.

National Highways Authority of India Act, 1988

The National Highways Authority of India Act, 1988 (the “NHAI Act”) provides for the constitution of an authority for the development, maintenance and management of National Highways. Pursuant to the same, the National Highways Authority of India (“NHAI”), was constituted as an autonomous body in 1989 and operationalized in 1995. Under the NHAI Act, Central Government carries out development and maintenance of the national highways system, through NHAI. The NHAI has the power to enter into and perform any contract necessary for the discharge of its functions under the NHAI Act.

The NHAI Act prescribes a limit in relation to the value of the contracts that may be entered into by NHAI. However, the NHAI may enter into contracts exceeding the value so specified, on obtaining prior approval of the Central Government. NHAI Act provides that the contracts for acquisition, sale or lease of immovable property on behalf of the NHAI cannot exceed a term of 30 years unless previously approved by the Central Government.

National Highways Development Project

The Government of India, under the Central Road Fund Act, 2000 created a dedicated fund for NHDP (the “**Fund**”). Certain sources for financing of NHDP are through securitization of cess as well as involving the private sector and encouraging Public Private Partnership (PPP). The NHDP is also being financed through long-term external loans from the World Bank, the ADB and the JBIC as well as through tolling of roads.

Private Participation in NHDP

In an effort to attract private sector participation in the NHDP, the NHAI has formulated model concession agreements where a private entity (the “**Concessionaire**”) is awarded a concession to build, operate and collect toll on a road for a specified period of time, which is usually up to 30 years.

The bidding for the projects takes place in two stages as per the process provided below:

- in the pre-qualification stage, NHAI selects certain bidders on the basis of technical and financial expertise, prior experience in implementing similar projects and previous track record; and
- in the second stage, NHAI invites commercial bids from the pre-qualified bidders on the basis of which the right to develop the project is awarded.

In a BOT project, the Concessionaire meets the up-front cost and expenditure on annual maintenance and recovers the entire cost along with the interest from toll collections during the concession period. To increase the viability of the projects, a capital grant is provided by the NHAI / GoI on a case to case basis. The Concessionaire at the end of the concession period transfers the road back to the Government. The Concessionaire’s investment in the road is recovered directly through user fees by way of tolls.

In annuity projects, the private entity is required to meet the entire upfront cost (no grant is paid by NHAI / GoI) and the expenditure on annual maintenance. The Concessionaire recovers the entire investment and pre-determined return on investments through annuity payments by NHAI / GoI.

In hybrid annuity projects, 40% of the total project cost is to be funded by the government and the remaining by the Concessionaire.

The NHAI also forms SPVs for funding road projects. This method of private participation involves very less cash support from the NHAI in the form of equity / debt. Most of the funds come from ports/financial institutions/beneficiary organisations in the form of equity / debt. The amount spent on developments of roads/highways is to be recovered in the

prescribed concession period by way of collection of toll fee by the SPV.

Tax incentives which are being provided to the private entity are eligible for 100% exemption for any consecutive 10 years out of the first 20 years after completion of a project. The Government has also allowed duty free import of specified modern high capacity equipment for highway construction.

Control of National Highways (Land and Traffic) Act, 2002

The Control of National Highways (Land and Traffic) Act, 2002 (the “**Control of NH Act**”) provides for control of land within national highways, right of way and traffic moving on national highways and also for removal of unauthorised occupation thereon.

In accordance with the provisions of the Control of NH Act, the Central Government has established Highway Administrations. Under the Control of NH Act, all land that forms part of a highway which vests in the Central Government, or that which does not already vest in the Central Government but has been acquired for the purpose of highways shall be deemed to be the property of the Central Government. The Control of NH Act prohibits any person from occupying any highway land or discharging any material through on such land without the permission of the Highway Administration. The Control of NH Act permits the grant of lease and license for use of highway land for temporary use.

Indian Tolls Act, 1851

The tolls levied under the Tolls Act, are deemed to be ‘public revenue’. The collection of tolls can be placed under any person as the state governments deem fit under the Tolls Act, and they are enjoined with the same responsibilities as if they were employed in the collection of land revenue. Further, all police officers are bound to assist the toll collectors in the implementation of the Tolls Act. The Tolls Act further gives power for recovery of toll and exempts certain category of people from payment of toll.

TAX RELATED LEGISLATIONS

Income-tax Act, 1961 (“Income Tax Act”)

The Income Tax Act is applicable to every company, whether domestic or foreign whose income is taxable under the provisions of this Act or Rules made there under depending upon its “Residential Status” and “Type of Income” involved. The Income Tax Act provides for the taxation of persons resident in India on global income and persons not resident in India on income received, accruing or arising in India or deemed to have been received, accrued or arising in India. Every company assessable to income tax under the Income Tax Act is required to comply with the provisions thereof, including those relating to tax deduction at source, advance tax, minimum alternative tax, etc.

Customs Act, 1962

The provisions of the Customs Act, 1962 and rules made there under are applicable at the time of import of goods i.e., bringing into India from a place outside India or at the time of export of goods i.e., taken out of India to a place outside India. Central Goods and Services Tax Act, 2017 (the “GST Act”)

The GST Act levies indirect tax throughout India to replace many taxes levied by the Central and State Governments. The GST Act was applicable from July 1, 2017 and combined the Central Excise Duty, Commercial Tax, Value Added Tax (VAT), Food Tax, Central Sales Tax (CST), Introit, Octroi, Entertainment Tax, Entry Tax, Purchase Tax, Luxury Tax, Advertisement Tax, Service Tax, Customs Duty, Surcharges. GST is levied on all transactions such as sale, transfer, purchase, barter, lease, or import of goods and/or services. India has adopted a dual GST model, meaning that taxation is administered by both the Union and State Governments. Transactions made within a single state is levied with Central GST (CGST) by the Central Government and State GST (SGST) by the government of that state. For inter-state transactions and imported goods or services, an Integrated GST (IGST) is levied by the Central Government. GST is a consumption-based tax; therefore, taxes are paid to the state where the goods or services are consumed and not the state in which they were produced.

It also provides for penalties for infringement, falsifying, and falsely applying trademarks and using them to cause confusion among the public. Section 18 of the Trademarks Act requires that any person claiming to be the proprietor of a trade mark used or proposed to be used by him, must apply for registration in writing to the registrar of trademarks. The trademark, once applied for and which is accepted by the Registrar of Trademarks (“the Registrar”), is to be advertised in the trademarks journal by the Registrar. The FDI Policy consolidates and subsumes all the press notes, press releases, and clarifications on FDI issued by DIPP till August 27, 2017. All the press notes, press releases, clarifications on FDI issued by DIPP till August 27, 2017 stand rescinded as on August 28, 2017. In terms of the FDI Policy, foreign investment is permitted (except in the prohibited sectors) in Indian companies either through the automatic route or the Government route, depending upon the sector in which foreign investment is sought to be made. In terms of the FDI Policy, the work of granting government approval for foreign investment under the FDI Policy and FEMA Regulations has now been entrusted to the concerned Administrative Ministries/Departments. FDI for the items or activities that cannot be brought in under the automatic route may be brought in through the approval route. Where FDI is allowed on an automatic basis without the approval of the Government, the RBI would continue to be the primary agency for the purposes of monitoring and regulating foreign investment. In cases where Government approval is obtained, no approval of the RBI is required except with respect to fixing the issuance price, although a declaration in the prescribed form, detailing the foreign investment, must be filed with the RBI once the foreign investment is made in the Indian company. The RBI, in exercise of its power under the FEMA, has also notified the Foreign Exchange Management (Transfer or Issue of Security by a Person Resident Outside India) Regulations, 2017 to prohibit, restrict or regulate, transfer by or issue of security to a person resident outside India. The restated summary financial information has been prepared by applying necessary adjustments to the financial statements ('financial statements') of the Company. The financial statements of the Company have been prepared in accordance with the Generally Accepted Accounting Principles in India (Indian GAAP) to comply with the accounting standards specified under section 133 of the Companies Act, 2013, of the Companies (Accounts) Rules, 2014 and the relevant provisions of the Companies Act, 2013 ("the 2013 Act"), as applicable and Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) regulations 2009, as amended (the "Regulations"). The financial statements have been prepared on accrual basis under the historical cost convention. The accounting policies adopted in the preparation of the financial statements are consistently applied.

b USE OF ESTIMATES

The preparation of the financial statements is in conformity with Indian GAAP (Generally Accepted Accounting Principles) which requires the management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent liabilities as on the date of the financial statements. The estimates and assumptions made and applied in preparing the financial statements are based upon management's best knowledge of current events and actions as on the date of financial statements. However, due to uncertainties attached to the assumptions and estimates made actual results could differ from those estimates. Any revision to accounting estimates is recognised prospectively in current and future periods.

c REVENUE RECOGNITION:

(i) Revenue from sale of goods is recognised when significant risk and rewards of ownership of the goods have been passed to the buyer and it is reasonable to expect ultimate collection. Sale of goods is recognised net of GST and other taxes as the same is recovered from customers and passed on to the government.

(ii) Interest is recognised on a time proportion basis taking into account the amount outstanding and the rate applicable.

(iii) Rent on immovable properties is recognised on accrual basis as per the agreement with the party.

(iv) Dividend income is recognised when right to receive is established.

d FOREIGN CURRENCY TRANSACTIONS.

Initial recognition

Transactions in foreign currency are accounted for at exchange rates prevailing on the date of the transaction.

Measurement of foreign currency monetary items at Balance Sheet date

Foreign currency monetary items (other than derivative contracts) as at Balance Sheet date are restated at the period end rates.

Exchange difference

Exchange differences arising on settlement of monetary items are recognised as income or expense in the period in which they arise. Exchange difference arising on restatement of foreign currency monetary items as at the year end being difference between exchange rate prevailing on initial recognition/subsequent restatement on reporting date and as at current reporting date is adjusted in the Statement of Profit & Loss for the respective year.

Any expense incurred in respect of Forward contracts entered into for the purpose of hedging is charged to the Statement of Profit and loss.

Forward Exchange Contract

The Premium or discount arising at the inception of the Forward Exchange contracts entered into to hedge an existing asset/liability, is amortized as expense or income over the life of the contract. Exchange Differences on such contracts are recognised in the Statement of Profit and Loss in the reporting period in which the exchange rates change. Any Profit or Loss arising on cancellation or renewal of such a forward contract is recognized as income or expense in the period in which such cancellation or renewal is made.

e INVESTMENTS

Non-Current/ Long-term Investments are stated at cost. Provision is made for diminution in the value of the investments, if, in the opinion of the management, the same is considered to be other than temporary in nature. On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the Statement of Profit and Loss. Current investments are carried at lower of cost and fair value determined on an individual basis. On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the Statement of Profit and Loss.

f PROPERTY, PLANT AND EQUIPMENT AND INTANGIBLE ASSETS

(i) Tangible Assets

Property, plant and equipment are stated at historical cost less accumulated depreciation, and accumulated impairment loss, if any. Historical cost comprises of the purchase price including duties and non-refundable taxes, borrowing cost if capitalization criteria are met, directly attributable expenses incurred to bring the asset to the location and condition necessary for it to be capable of being operated in the manner intended by management and initial estimate of decommissioning, restoring and similar liabilities.

Subsequent costs related to an item of property, plant and equipment are recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the group and the cost of the item can be measured reliably.

The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are recognized in statement of profit and loss during the reporting period when they are incurred.

An item of property, plant and equipment is derecognized on disposal or when no future economic benefits are expected from its use or disposal. The gains or losses arising from de-recognition are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is de-recognized.

g DEPRECIATION AND AMORTISATION

The Company provides for depreciation on tangible assets to the extent of depreciable amount on written down value method. Depreciation is provided based on useful life and residual value of the assets as prescribed in Schedule II to the Companies Act, 2013.

Depreciation on additions to assets or on sale / discardment of assets is provided on pro rata basis from the month in which assets have been put to use, up to the month prior to the month in which assets have been disposed off. Depreciation on additions to assets is provided over the residual life of the respective asset.

Leasehold improvements are amortised over of the lease or life of the asset whichever is less.

h INVENTORIES:

Inventories of traded goods are valued at lower of cost and net realizable value. Cost comprises of all costs of purchase and other costs incurred in bringing the inventories to their present location and condition . Cost formula used is First in First Out Method. Net realizable value is the estimated selling price in the ordinary course of business, less estimated cost necessary to make the sale.

i IMPAIRMENT OF ASSETS:

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

The Company bases its impairment calculation on detailed budgets and forecast calculations which are prepared separately for each of the Company's cash-generating units to which the individual assets are allocated. These budgets and forecast calculations are generally covering a period of five years. For longer periods, a long term growth rate is calculated and applied to project future cash flows after the fifth year. Impairment losses of continuing operations are recognised in the statement of profit and loss.

An assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the Company estimates the asset's or cash-generating unit's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit and loss.

j EMPLOYEE BENEFITS:

(i) Short-term employee benefits Short term employee benefits are recognised as an expense at the undiscounted amount in the statement of Profit and loss for the year which includes benefits like salary, wages, bonus and are recognised as expenses in the period in which the employee renders the related service

(ii) Post employment benefits: Defined Contribution Plan

Retirement benefit in the form of provident fund is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The Company recognises contribution payable to the provident fund scheme as an expenditure, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognised as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognised as an asset to the extent that the pre payment will lead to, for example, a reduction in future payment or a cash refund. Defined benefit Plans

Unfunded Plan: The Company has a defined benefit plan for Post-employment benefit in the form of Gratuity.

Liability for the above defined benefit plan is provided on the basis of valuation, as at the Balance Sheet date, carried out by an independent actuary. The actuarial method used for measuring the liability is the Projected Unit Credit method.

Accumulated leave, which is expected to be utilised within the next 12 months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date. The Company recognises termination benefit as a liability and an expense when the Company has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the termination benefits fall due more than 12 months after the balance sheet date, they are measured at present value of future cash flows using the discount rate determined by reference to market yields at the balance sheet date on government bonds.

k BORROWING COST

Borrowing costs are interest, commitment charges and other costs incurred by an enterprise in connection with Short Term/ Long Term borrowing of funds. Borrowing cost directly attributable to acquisition or construction of qualifying assets are capitalized as a part of the cost of the assets, upto the date the asset is ready for its intended use. All other borrowing costs are recognized in the Statement of Profit and Loss in the year in which they are incurred.

l EARNINGS PER SHARE:

The earnings in ascertaining the Company's EPS comprises the net profit after tax attributable to equity shareholders and includes the post tax effect of any extraordinary items. The number of shares used in computing basic EPS is the weighted average number of shares outstanding during the year.

Diluted earnings per share is computed by dividing the profit/(loss) after tax attributable to Equity Shareholders (including the post tax effect of extra ordinary items, if any) as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares which could have been issued on conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. Dilutive potential equity shares are determined independently for each period.

m TAXATION:

Tax expense for the year comprising current tax & deferred tax are considered in determining the net profit for the year. Provision is made for current tax and based on tax liability computed in accordance with relevant tax laws applicable to the Company. Provision is made for deferred tax for all timing difference arising between taxable incomes & accounting income at currently enacted or substantively enacted tax rates, as the case may be. Deferred tax assets (other than in situation of unabsorbed depreciation and carry forward losses) are recognized only if there is reasonable certainty that they will be realized and are reviewed for the appropriateness of their respective carrying values at each Balance Sheet date. Deferred tax assets, in situation of unabsorbed depreciation and carry forward losses under tax laws are recognised only to the extent that where is virtual certainty supported by convincing evidence that sufficient future taxable income will be available against which such deferred tax assets can be recognised. Deferred Tax Assets and Deferred Tax Liability are been offset wherever the Company has a legally enforceable right to set off current tax assets against current tax liability and where the Deferred Tax Asset and Deferred Tax Liability relate to Income taxes is levied by the same taxation authority.

n PROVISIONS, CONTINGENT LIABILITIES AND CONTINGENT ASSETS:

(i) Provisions

A provisions is recognized when the Company has a present obligation as a result of past event, if it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of obligation.

(ii) Contingent Liability

Contingent Liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only on the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

(ii) Contingent Assets

Contingent Assets are neither recognised nor disclosed in the financial statements.

p CASH & CASH EQUIVALENTS

Except as otherwise stated in this Draft Prospectus and the Risk Factors given in the Draft Prospectus, the following important factors could cause actual results to differ materially from the expectations include, among others:

Regulatory Framework

We have obtained all regulatory permissions which are necessary to run our business, Further, some of the approvals are granted for fixed periods of time and need renewals, which are obtained in the course of business, however, there may be change in statutory regulations at any time which cannot be predicted by us. There can be no assurance that the change in regulations will not impact our operations in the future.

Ability of Management

Our success depends on the continued services and performance of the members of our management team and other key employees. Competition for senior management in the industry is intense, and we may not be able to retain our existing senior management or attract and retain new senior management in the future. The loss of the services of our Promoters could seriously impair our ability to continue to manage and expand our business. Further, the loss of any other member of our senior management or other key personnel may adversely affect our business, results of operations and financial condition.

Ability to manage logistics and transportation needs

Apart from in-house transportation facility we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation from our factory to our customers and other markets. Since the cost of our goods also carried by third party transporters is typically much higher than the consideration paid for transportation, it may be difficult for us to recover damages for damaged, delayed or lost goods. Our operations and profitability are dependent upon the availability of transportation and other logistic facilities in a time and cost-efficient manner. Accordingly, our business is vulnerable to increased transportation costs, transportation strikes and lock-outs, shortage of labour, delays and disruption of transportation services for events such as weather-related problems and accidents. Further, global supply chains can be impacted with the increase in the fees of shipping routes putting cost pressures. Further, movement of goods encounters additional risks such as accidents, pilferage, spoilage or shrinkage may adversely affect our operations, results of operations and financial condition. Although we have not experienced any material logistics and transport related disruptions in the past, any prolonged

disruption or unavailability of such facilities in a timely manner could result in delays or non-supply or may require us to look for alternative sources which may not be cost-effective, thereby adversely affecting our operations, results of operations, cash flows and financial condition.

Market & Economic conditions

India is one of the largest economies and is growing at a rapid pace. But in this globalised economy, all the businesses face an uncertain level of volatility from unexpected global events which ranges from global pandemics to wars, to weather changes to supply chain disruption, which may change the economic dynamics and the purchasing capability of the end customers. At the time of market slowdown the demand falls which has adverse impact on our business.

Competition

We operate in a competitive atmosphere. Our competition varies by market, geographic areas and type of products. Our Company may face stiff competition from domestic as well as global market as the dynamic changes. Some of our competitors may have greater resources than those available to us. While service quality, technical ability, performance records, etc are key factors in client decisions among competitors, however, price & quality are the deciding factor in most cases. Further, this industry is fragmented with many small and medium sized companies and entities, which manufactures some of these products at various levels, which may adversely affect our business operation and financial condition. Further, there are no entry barriers in this industry and any expansion in capacity of existing manufacturers would further intensify competition. Moreover, as we seek to diversify into new geographical areas, new territories, new emerging markets, we face competition from competitors that have a pan-India presence and also from competitors that have a strong presence in regional markets. The markets in which we compete and intend to compete are undergoing, and are expected to continue to undergo, rapid and significant change. We expect competition to intensify as technological advances and consolidations continue. These competitive factors may force us to reduce rates, and to pursue new market opportunities. Increased competition could result in reduced demand for our products, increased expenses, reduced margins and loss of market share. Failure to compete successfully against current or future competitors could harm our business, operating cash flows and financial condition.

COVID-19 Pandemic

Since the onset of the COVID-19 pandemic in March 2020, our Company's operations have been affected as our employees faced the threat of getting infected. In 2020, cases of the novel corona virus started rapidly increasing in India, which led the government of India to impose a nationwide lockdown. The spread of Covid-19 and its recent developments have had and might continue to have repercussions across local, national and global economies. To prevent the spread of Covid-19 and to comply with the restrictions, we had to temporarily suspend our operations in order to follow the Government's norms. We continuously monitored the economic conditions and have outlined sufficient measures to combat the pandemic situation at our business premises. Once the lockdown was lifted, our operations restarted in full swing. Initially we did find a little hiccup in finding workers but because of our enterprising organization, we were able to source quality workforce and we were able to train them and we restarted our operations. After lifting the lockdown and resuming our operations the demand in our industry abruptly increased from the different sectors and we attained the highest production during the partial year 2020-21 and FY 2021-22. The demand after pandemic ultimately nullified the impact of shutdown during COVID 19 pandemic. The future impact of COVID-19 or any other severe communicable disease on our business and results of operations depends on several factors including those discussed in the chapter "*Risk Factors*" beginning on Page No. **Error! Bookmark not defined.** We continue to closely monitor the economic conditions and the effect of COVID-19 and have outlined certain measures to combat the pandemic situation and to minimize the impact on our business.

PHASED IMPLEMENTATION OF UNIFIED PAYMENTS INTERFACE

SEBI has issued UPI Circulars in relation to streamlining the process of public Offer of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public Offer closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 and will continue till June 30, 2019. Under this phase, a Retail Individual Investor would also have the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public Offer closure to listing would continue to be six working days.

Phase II: This phase commenced on completion of Phase I, i.e., with effect from July 1, 2019 and was to be continued for a period of three months or launch of five main board public issues, whichever is later. Further, as per the SEBI circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount be continued till further notice. Under this phase, submission of the Application Form by a Retail Individual Investor through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public offer closure to listing would continue to be six working days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public Offer closure to listing is proposed to be reduced to three working days.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circulars include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful applicants to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the post-offer LM will be required to compensate the concerned investor.

The Offer will be made under UPI Phase II of the UPI Circular, unless UPI Phase III of the UPI Circular becomes effective and applicable on or prior to the Offer Opening Date. All SCSBs offering facility of making application in public Offers shall also provide facility to make application using UPI.

Our Company and the Selling Shareholders will be required to appoint one or more of the SCSBs as a Sponsor Bank(s) to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the UPI Investors.

The processing fees may be released to the remitter banks (SCSBs) only after an application is made by the SCSBs to the LM with a copy to the Registrar, and such application shall be made only after (i) unblocking of application amounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB in accordance with April 20, 2022 Circular.

For further details, refer to the General Information Document available on the websites of the Stock Exchange and the Lead Manager.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as Department of Industrial Policy and Promotion) (“DPIIT”), issued the FDI Policy Circular of 2020 (“FDI Policy”), which, with effect from October 15, 2020, subsumes and supersedes all press notes, press releases, clarifications, circulars issued by the DPIIT, which were in force as on October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that: (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the SEBI SAST Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

On October 17, 2019, Ministry of Finance, Department of Economic Affairs, had notified the FEMA Rules, which had replaced the Foreign Exchange Management (Transfer and Issue of Security by a Person Resident Outside India) Regulations 2017. Foreign investment in this Issue shall be on the basis of the FEMA Rules. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020 issued on December 8, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India.

As per the FDI policy, the sector in which our Company operates, is permitted up to 100% of the paid-up share capital of such company under the automatic route.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue. For further details, see “*Issue Procedure*” on page 238 of this Prospectus. Each Applicant should seek independent legal advice about its ability to participate in the issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Applicant shall intimate our Company and the Registrar in writing about such approval along with a copy thereof within the Issue Period.

The Equity Shares issued in the Issue have not been and will not be registered under the U.S. Securities Act or any state securities laws of the United States and, unless so registered, may not be issued or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws of the United States. Accordingly, the Equity Shares are only being issued and sold only outside the United States in offshore transactions in compliance with Regulation S under the U.S. Securities Act and the applicable laws of the jurisdictions where those issues and sales occur.

The Equity Shares have not been and will not be registered, listed or otherwise qualified in any other jurisdiction outside India and may not be issued or sold, and Application may not be made by persons in any such jurisdiction, except in compliance with the applicable laws of such jurisdiction.

And such lien shall extend to all dividends and bonuses from time to time declared in respect of such shares/debentures. Unless otherwise agreed the registration of a transfer of shares/debentures shall operate as a waiver of the Company's lien if any, on such shares/debentures. The Directors may at any time declare any shares/debentures wholly or in part to be exempt from the provisions of this clause. The Board may at any time declare any shares/debentures wholly or in part to be exempt from the provisions of this clause.

17. The company may sell, in such manner as the Board thinks fit, any shares on which the company has a lien;

Provided that no sale shall be made —

- a. unless a sum in respect of which the lien exists is presently payable; or
- b. until the expiration of fourteen days after a notice in writing stating and demanding payment of such part of the amount in respect of which the lien exists as is presently payable, has been given to the registered holder for the time being of the share or the person entitled thereto by reason of his death or insolvency.

18. (i) To give effect to any such sale, the Board may authorize some person to transfer the shares sold to the purchaser thereof.

(ii) The purchaser shall be registered as the holder of the shares comprised in any such transfer.

(iii) The purchaser shall not be bound to see to the application of the purchase money, nor shall his title to the shares be affected by any irregularity or invalidity in the proceedings in reference to the sale.

19. (i) The proceeds of the sale shall be received by the company and applied in payment of such part of the amount in respect of which the lien exists as is presently payable.

(ii) The residue, if any, shall, subject to a like lien for sums not presently payable as existed upon the shares before the sale, be paid to the person entitled to the shares at the date of the sale.

20. In exercising its lien, the Company shall be entitled to treat the registered holder of any share as the absolute owner thereof and accordingly shall not (except as ordered by a court of competent jurisdiction or unless required by any statute) be bound to recognise any equitable or other claim to, or interest in, such share on the part of any other Person, whether a creditor of the registered holder or otherwise. The Company's lien shall prevail notwithstanding that it has received notice of any such claim.

21. The provisions of these Articles relating to Lien shall mutatis mutandis apply to any other Securities including debentures of the Company, if any.

CALLS ON SHARES

22. (i) The Board may, from time to time, make calls upon the members in respect of any monies unpaid on their shares (whether on account of the nominal value of the shares or by way of premium) and not by the conditions of allotment thereof made payable at fixed times:

Provided that no call shall exceed one-fourth of the nominal value of the share or be payable at less than one month from the date fixed for the payment of the last preceding call.

(i) If a sum called in respect of a share is not paid before or on the day appointed for payment thereof, the person from whom the sum is due shall pay interest thereon from the day appointed for payment thereof to the time of actual payment at ten per cent per annum or at such lower rate, if any, as the Board may determine.

(ii) The Board shall be at liberty to waive payment of any such interest wholly or in part.

26. (i) Any sum which by the terms of issue of a share becomes payable on allotment or at any fixed date, whether on account of the nominal value of the share or by way of premium, shall, for the purposes of these regulations, be deemed to be a call duly made and payable on the date on which by the terms of issue such sum becomes payable.

(ii) In case of non-payment of such sum, all the relevant provisions of these regulations as to payment of interest and expenses, forfeiture or otherwise shall apply as if such sum had become payable by virtue of a call duly made and notified.

27. (a) The Board may, if it thinks fit, receive from any Member willing to advance the same, all or any part of the amounts of his respective shares beyond the sums, actually called up and upon the moneys so paid in advance, or upon so much thereof, from time to time, and at any time thereafter as exceeds the amount of the calls then made upon and due in respect of the shares on account of which such advances are made the Board may pay or allow interest, at such rate as the member paying the sum in advance and the Board agree upon. The Board may agree to repay at any time any amount so advanced or may at any time repay the same upon giving to the Member three months' notice in writing: provided that moneys paid in advance of calls on shares may carry interest but shall not confer a right to dividend or to participate in profits.

(b) No Member paying any such sum in advance shall be entitled to voting rights in respect of the moneys so paid by him until the same would but for such payment become presently payable.

28. The provisions of these Articles relating to calls shall mutatis mutandis apply to any other securities including debentures of the Company, if any.

(ii) The instrument of transfer shall after registration be retained by the Company and shall remain in its custody. All the instruments of transfer which the Board may decline to register shall on demand be returned to the person depositing the same unless the Board otherwise determines. The Directors may cause to be destroyed all transfer deeds lying with the Company after such period as they may determine

33. The Company shall, within one month from the date on which the instrument of transfer, or the intimation of such transmission, as the case may be, was delivered to Company, send notice of the refusal to the transferee and the transferor or to the person giving intimation of such transmission, as the case may be, giving reasons for such refusal.

PROVIDED THAT registration of transfer shall however not be refused on the ground of the transferor being either alone or jointly with any other person or persons indebted to the Company on any account whatsoever.

34. No fee shall be charged for registration of transfer, transmission, probate, succession certificate and letter of administration, certificate of death or marriage, power of attorney or similar other document with the Company.

(ii) Nothing in clause (i) shall release the estate of a deceased joint holder from any liability in respect of any share which had been jointly held by him with other persons.

38. (i) Any person becoming entitled to a share in consequence of the death or insolvency of a member may, upon such evidence being produced as may from time to time properly be required by the Board and subject as hereinafter provided, elect, either—

(a) to be registered himself as holder of the share; or

(b) to make such transfer of the share as the deceased or insolvent member could have made.

(ii) The Board shall, in either case, have the same right to decline or suspend registration as it would have had, if the deceased or insolvent member had transferred the share before his death or insolvency.

39. (i) If the person so becoming entitled shall elect to be registered as holder of the share himself, he shall deliver or send to the company a notice in writing signed by him stating that he so elects.

(ii) If the person aforesaid shall elect to transfer the share, he shall testify his election by executing a transfer of the share.

(iii) All the limitations, restrictions and provisions of these regulations relating to the right to transfer and the registration of transfers of shares shall be applicable to any such notice or transfer as aforesaid as if the death or insolvency of the member had not occurred and the notice or transfer were a transfer signed by that member.

40. A person becoming entitled to a share by reason of the death or insolvency of the holder shall be entitled to the same dividends and other advantages to which he would be entitled if he was the registered holder of the share, except that he shall not, before being registered as a member in respect of the share, be entitled in respect of it to exercise any right conferred by membership in relation to meetings of the company:

Provided that the Board may, at any time, give notice requiring any such person to elect either to be registered himself or to transfer the share, and if the notice is not complied with within ninety days, the Board may thereafter withhold payment of all dividends, bonuses or other monies payable in respect of the share, until the requirements of the notice have been complied with.

41. The Company shall incur no liability or responsibility whatsoever in consequence of its registering or giving effect to any transfer of shares made or purporting to be made by any apparent legal owner thereof (as shown or appearing in the Register of Members) to the prejudice of Persons having or claiming any equitable right, title or interest to or in the said shares, notwithstanding that the Company may have had notice of such equitable right, title or interest or notice prohibiting registration of such transfer and may have entered such notice referred thereto in any book of the Company and the Company shall not be bound or required to regard or attend or give effect to any notice which may be given to it of any equitable right, title or interest or be under any liability whatsoever for refusing or neglecting so to do, though it may have been entered or referred to in some book of the Company, but the Company shall nevertheless be at liberty to regard and attend to any such notice and give effect thereto if the Directors shall so think fit.

FORFEITURE OF SHARES

42. If a member fails to pay any call, or installment of a call, on the day appointed for payment thereof, the Board may, at any time thereafter during such time as any part of the call or installment remains unpaid, serve a notice on him requiring payment of so much of the call or installment as is unpaid, together with any interest which may have accrued.

43. The notice aforesaid shall—

(a) name a further day (not being earlier than the expiry of fourteen days from the date of service of the notice) on or before which the payment required by the notice is to be made; and

(b) state that, in the event of non-payment on or before the day so named, the shares in respect of which the call was made shall be liable to be forfeited.

44. If the requirements of any such notice as aforesaid are not complied with, any share in respect of which the notice has been given may, at any time thereafter, before the payment required by the notice has been made, be forfeited by a resolution of the Board to that effect.

45. (i) A forfeited share may be sold or otherwise disposed off on such terms and in such manner as the Board thinks fit.

(ii) At any time before a sale or disposal as aforesaid, the Board may cancel the forfeiture on such terms as it thinks fit.

46. Neither the receipt by the Company for a portion of any money which may from time to time be due from any Member in respect of such Member's shares, nor any indulgence that may be granted by the Company in respect of payment of any such money, shall preclude the Company from thereafter proceeding to enforce a forfeiture in respect of such shares as herein provided. Such forfeiture shall include all dividends declared or any other moneys payable in respect of the forfeited shares and not actually paid before the forfeiture. The forfeiture of a share shall involve extinction at the time of forfeiture, of all interest in and all claims and demands against the Company, in respect of the share and all other rights incidental to the share.

47. (i) A person whose shares have been forfeited shall cease to be a member in respect of the forfeited shares, but shall, notwithstanding the forfeiture, remain liable to pay to the company all monies which, at the date of forfeiture, were presently payable by him to the company in respect of the shares.

(ii) The liability of such person shall cease if and when the company shall have received payment in full of all such monies in respect of the shares.

48. (i) A duly verified declaration in writing that the declarant is a director, the manager or the secretary, of the company, and that a share in the company has been duly forfeited on a date stated in the declaration, shall be conclusive evidence of the facts therein stated as against all persons claiming to be entitled to the share;

(ii) The company may receive the consideration, if any, given for the share on any sale or disposal thereof and may execute a transfer of the share in favour of the person to whom the share is sold or disposed of;

(iii) The transferee shall thereupon be registered as the holder of the share; and

(iv) The transferee shall not be bound to see to the application of the purchase money, if any, nor shall his title to the share be affected by any irregularity or invalidity in the proceedings in reference to the forfeiture, sale or disposal of the share.

49. The provisions of these regulations as to forfeiture shall apply in the case of non-payment of any sum which, by the terms of issue of a share, becomes payable at a fixed time, whether on account of the nominal value of the share or by way of premium, as if the same had been payable by virtue of a call duly made and notified.

50. The provisions of these Articles relating to forfeiture of shares shall mutatis mutandis apply to any other securities including debentures of the Company, if any.

SHARE WARRANTS

51. The Company may issue share warrants subject to, and in accordance with, the provisions of the Act; and accordingly the Board may in its discretion, with respect to any share which is fully paid up, on application in writing signed by the person registered as holder of the share, and authenticated by such evidence (if any) as the Board may, from time to time, require as to the identity of the person signing the application, and on receiving the certificate (if any) of the share, and the amount of the stamp duty on the warrant and such fee as the Board may from time to time require, issue a share warrant.

52. The bearer of a share warrant may at any time deposit the warrant at the office of the Company, and so long as the warrant remains so deposited, the depositor shall have the same right of signing a requisition for calling a meeting of the Company, and of attending, and voting and exercising the other privileges of a Shareholder at any meeting held after the expiry of two clear days from the time of deposit, as if his name were inserted in the register of members as the holder of the shares included in the deposited warrant.

53. Not more than one person shall be recognized as depositor of the share warrant.

54. The Company shall, on two days' written notice, return the deposited share warrant to the depositor.

55. 56. The bearer of a share warrant shall be entitled in all other respects to the same privileges and advantages as if he were named in the register of members as the holder of the shares included in the warrant, and he shall be a member of the Company.

c. the holders of stock shall, according to the amount of stock held by them, have the same rights, privileges and advantages as regards dividends, voting at meetings of the company, and other matters, as if they held the shares from which the stock arose; but no such privilege or advantage (except participation in the dividends and profits of the company and in the assets on winding up) shall be conferred by an amount of stock which would not, if existing in shares, have conferred that privilege or advantage.

d. such of the regulations of the company as are applicable to paid-up shares shall apply to stock and the words “share” and “shareholder” in those regulations shall include “stock” and “stock-holder” respectively.
